

The Power of eyeQ

Read what users experience with this remarkable program

Students:

"Because of **eyeQ**, my son Drew was able to raise his ACT scores immensely. It was able to get him an academic scholarship to the University of Chicago for \$39,000."

S. Martinez, Parent

"The first time I took the ACT, near the end of my junior year of high school, I walked out of there and I knew that I had not done very well, because I didn't have enough time to complete all of the sections. Because of **eyeQ**, I am now a freshman in Lyman Briggs College at Michigan State University, and I am pre-med major. Hopefully I will be attending med school in the future. Thanks **eyeQ!**"

B. Craggs, Student

"I have a 7 year old daughter who is in the 2nd grade now. When she started the **eyeQ** program, her reading test score was 70 wpm but now her reading test scores are in the 900's and progressing. I just wish that other kids in her class would have the opportunity to experience this life changing course. It not only gave my daughter a lot of confidence in reading, it also improved her focus and ability to understand and process thoughts more quickly. She even helps her younger sister do homework and read books. We are loving it! Thank you!"

J. Sa, Parent

Graduate Students:

"I am an aspiring law student studying to take the LSAT. One of the big sections in the test is Reading Comprehension in which there are 4 short stories that you must read and answer typically 27 questions in 35 minutes. Before **eyeQ** I could only get through maybe three and my best score was 62% on that portion of the test. So I purchased **eyeQ** at the recommendation of my instructor and realized I was only reading around 300 words per minute. After the first week of using the program I doubled that to 600. At the end of the program I am comfortable around 1250 words per minute. Not only can I get through all 4 tests my comprehension of what I am reading has followed. I now score in at the very least 75th percentile. This program is one of the major reasons I will get into law school."

J. Grusman, Law Student

"I am a third year law student with a heavy load of reading, as well as the bar exam to prepare for. Not only am I getting through my reading at a faster pace, but I am no longer fatigued. The brain fog seems to be lifted. The mini readings and exercises are perfect when I begin to tire after hours of study. I think eyeQ should be a requirement for anyone going into the legal field. THANK YOU SO MUCH!!!"

E. Christlieb, Law Student & Juris Doctor Candidate

Educators:

"**EyeQ** is, without doubt, one of the greatest advantages a student can give themselves. **EyeQ** not only results in a dramatic increase in reading speed, it also drives comprehension significantly higher. I have been recommending **eyeQ** to my university students and to my LSAT students for years. Every single one of them thanks me to this day: it is a truly life-changing product."

B. Lord-Leutwyler, Award-winning teacher

"I live a hectic life style as a law student and 7th grade teacher. I needed a program that would help me stay on top of my required readings, grading papers and find time for a novel. A close friend recommended this program and after trying the demo on the internet, I was completely sold. There has been a major improvement with my reading since starting **eyeQ**. In the past, I've tried several programs, i.e. cassette tapes, books, etc. and didn't see any progress. As an educator, I highly recommend this product for anyone."

K. Bey, Law Student & Teacher

Business People:

"When I first began this exercise, I was reading between 250-300 words a minute. Today, after applying these exercises daily, I am reading between 1000-1200 words per minute. I am able to process much more information and retain that information. Not only have I increased my reading speed, I am much more productive in my job assignments."

S. Waynick, Chase Bank

"One of the biggest challenges of information overload is the variety of media coming at you. Emails are no longer personal messages, but now have attachments of what seem like unlimited reading material to sort through. The **eyeQ** program has paid for itself many times over in the amount of time that I have saved by accelerating my ability to process pertinent information much quicker."

D. Hancock, Attorney

Doctors:

"With **eyeQ**, we are able to push brain function to limits that we never thought were achievable in the past. We have a desperately important window of opportunity in dealing with children in terms of their brain development. What we have found with the **eyeQ** program, is it really enhances the child's performance immediately. There is a dramatic increased activity in the brain, especially in those areas most important for reading and comprehension, in just one 7-minute session of the **eyeQ** program. This is leading edge technology and provides very compelling evidence that this is a program that really does what it claims to do."

D. Perlmutter, M.D., FACN, Board Certified Neurologist & Brain Specialist

"It was very easy to incorporate the **eyeQ** Reading Program, because it is user friendly and stores its own results. The feedback was immediate and reinforcing. The **eyeQ** program catches the user's attention and holds it. **EyeQ** is fun and engaging, making the program less of a chore. It also may have the added ability to increase perpetual sensitivity, a problem in learning disorders like ADD/ADHD. Our experience with the **eyeQ** reading program was extremely successful. Overall, the program was a success and will continue to be part of the ADD program at the clinic."

Dr. P. Pappas, Doctor and Radio Talk Show host

Vision Therapy:

"We have been using the **eyeQ** program at Sensory Learning Center. This program reinforces oculomotor skills in pursuits and saccades and peripheral awareness techniques to improve tracking coordination skills. **EyeQ** also reinforces visual memory skills along with stimulating the parvo-magno cellular layers synchronizing both center and peripheral fields in the lateral geniculate body of the brain. The result is a significant increase in my patient's ability to read and comprehend. The response has been overwhelming with patient, parent, therapist, and doctor all noticing significant increases with reading and comprehension speed. It has been a huge tool to add to our practice to insure our patient's success."

Bradley. E Habermehl, OD, FCOVD

"We have been using the **eyeQ** program at our office, Highline Vision Center. A patient who is a slow reader is always amazed that comprehension increases when he learns to read faster. This program has been most effective with patients twelve years and up, but we do use the program with younger children as well. We have really enjoyed using it for college bound students who will be taking the college entrance exams. Many of our patients have purchased the program for home use and we also use the program in our office on a daily basis. We truly find the **eyeQ** program a great way to increase success!"

The Vision Staff at Highline Vision Center

Special Needs:

"I was diagnosed with **dyslexia** in the 5th grade. When Mr. Priestley told us that we were going to start the **eyeQ** program I thought, 'Great! I'm going to fail this portion of my class,' because I don't do well with reading because of my dyslexia. Once we started the **eyeQ** program I noticed that all my reading speed scores were higher than everyone else in the class. I thought that there was something wrong with my program, but the **eyeQ** program actually helped my reading a lot! Now in my other classes when we have to read articles, I'm the first one to be done - and I'm dyslexic!"

Alexis, High School Freshman

"I have had severe **ADD** and **Dyslexia** since I was a child and I have always hated reading and actually dreaded school. After my mom got the **eyeQ** program for me, I didn't want to do it, but I finally challenged myself to make it work. I love reading now!! I like to challenge myself on how fast I can read. Totally awesome! **EyeQ** is really incredible software that now allows me to have confidence in completing my school work. I now believe that I will be able to keep up with the rest of the class and even get ahead of them because of my reading. I can't tell you how much this has made my life so much more wonderful."

B. Zachry, Student, Texas-San Antonio
